

ProCom X12

Wireless Belt Pack Headset Intercom

ProCom X12 Belt Pack

About the new ProCom X12

The new ProCom X12 is a next generation wireless belt pack headset intercom system that can support a number of users who can talk at any time without the need for a base station. The full duplex, lightweight belt packs support a wide variety of headset types and styles.

The ProCom X12 provides superior sound quality and range to meet the needs of those needing critical task coordination using "hot mic" conversational communication. For example, if I say "stop" while you are talking, you will hear my command.
