

## **NEW WIRELESS HEADSET SYSTEM (NO BASE STATION NEEDED)**

*Please consider our NEW X16 Atlas All-In-One wireless headset system. You will like this headset and is worth consideration as the next generation for the following reasons (compared to the DX300 system WH30 wireless headset):*

- More than double the range and penetration
- Much louder with more isolation from noise in room
- Up to 16 hands-free simultaneous talkers on up to 6 selectable conversations (channels) without base stations

### **NOW IN STOCK!**

- Hard hat compatible headset models
- Single side headset model
- Ships within days, not months lead time

Give me a call **859-489-6241** or send me an email [david.fried@comtronicsnow.com](mailto:david.fried@comtronicsnow.com) for an X16 Atlas headset system quote and product flyers, or request a demo.

*We also still sell, repair and support WH301 headsets and the DX300 headset system (HME Clearcom). The X12 headset system is still available and supported. We are also a Motorola Solutions partner selling XPR3500e, XPR7500e and the new R7 Mototrbo two-way digital portable radios.*

### **The X16 Atlas**

- No Base Stations needed
- 900 Mhz (will not interfere with DX300 headset systems which is on 2400 MHz)

- Unlimited number of Headsets
- 6 voice channels (separate conversations)
